

# Interstellar Voyager

Name \_\_\_\_\_ Date \_\_\_\_\_

**Directions:** Write your responses on this sheet or on separate paper.

1. What is the definition of *interstellar space*?
2. In what year was *Voyager 1* launched from Earth, and how long had it been traveling in space when this video was made?
3. What kind of telescope allowed scientists to “see” *Voyager 1* even though it is billions of miles from Earth?

4. How did scientists know that *Voyager 1* had passed into interstellar space?

5. Why does the Voyager Project Scientist in the video say that *Voyager 1* reaching interstellar space is “... a historic milestone in the great journeys of exploration that have been undertaken by human kind”?
