

Name \_\_\_\_\_ Date \_\_\_\_\_

1. What makes Earth different from any other planet in our solar system?
2. Mars is very cold, and Venus is very hot. What features help to make Earth's temperature perfect for life?

3. What do the colors mean in this picture of Earth?

4. Earth's crust is made up of many plates that fit together. They are always on the move, but very slowly. Why do you think most earthquakes occur along these plates?
5. If Earth ever becomes an unsafe place to live, what should people do?

---

**Teacher Instructions:** Have students write their responses on this sheet or on separate paper.
