**Directions:** Write your responses on this sheet or on separate paper.

1. Why is this video titled “Saturn Moon Ballet”?

2. How are moons and planets similar, and how are they different?

3. Earth has one Moon, and Saturn has at least sixty-two moons. Why do you think Saturn has so many moons?

4. Saturn has very prominent rings as shown in the video. Why do some planets have rings while other do not?

5. The Cassini mission to Saturn did not include astronauts. What dangers could people face if they wanted to fly near Saturn?
