Level Summary by Grade Span

While most Science A-Z books fall within these Lexile ranges, some titles may differ slightly. This is due to differences between the Learning A-Z system, which considers both quantitative and qualitative measures, and the Lexile system, which uses quantitative algorithms to determine scores.

- | | | |
|---------------------|---------------------|----------------------|
| K-2 low: 200L-440L | 3-4 low: 500L-790L | 5-6 low: 650L-940L |
| K-2 mid: 250L-540L | 3-4 mid: 550L-840L | 5-6 mid: 700L-990L |
| K-2 high: 400L-540L | 3-4 high: 600L-890L | 5-6 high: 800L-1090L |

Refer to the chart for a range of correlations between Science A-Z reading levels and Lexile text measures. This chart may be used to assign appropriate science texts to students. Teachers should consider the content demands on the reader and tasks associated with a text to help select level-appropriate science material for each student. To view level data for a specific *Unit Nonfiction Book* or *FOCUS Book*, check the book's title page.
